

HAWORTH

Zody II & Zody LX

Task Seating

The drive for healthy workplaces that support employee well-being has never been stronger. Challenges attracting and retaining employees have highlighted the need for a well-being strategy that considers the entire employee experience. Organizations seek inviting, easy-to-use, comfortable seating solutions that support a wide range of body types and a variety of tasks—without complicated adjustments.

Building upon Haworth's legacy of seating research and expertise, Zody® II and Zody LX deliver unmatched comfort for more people in every posture. In addition to proven ergonomic performance and support, Zody II and Zody LX feature improved sustainability and offer extensive design choices.

Comfort for All

Zody II and Zody LX are dimensionally more accommodating to provide enhanced ergonomic comfort for more people. Easy-to-use adjustments let anyone customize their individual seating experience for their preferences. The first chairs in the North American market to offer a dual posture feature, Zody II and Zody LX support more postures too—from seated to the in-between “perch” of sit-to-stand—making them each an ideal companion for a height-adjustable table.

Why Dual Posture?

Zody II and Zody LX are the most researched ergonomic chairs on the market, with over 20 years of sitting research and analysis behind them. Based on field studies, the majority of respondents chose the “in-between of sit-to-stand” supported by dual posture as the position that allowed them to do their best work vs. seated and standing—particularly at a height-adjustable table. Results also showed that dual posture promoted well-being and healthy movement, increasing posture changes throughout the day by 11%. Intensity and frequency of discomfort were reported to be significantly lower than standing, as well.

A Leader in Sustainability

Building on the environmental heritage of Zody Classic, Zody II and Zody LX meet the demands of a circular environment by incorporating recycled content, healthy materials, attributes, and programs that extend useful product life, as well as material recovery capabilities afterward.

Design Choices

The Zody II and Zody LX task seating lineup includes task chairs and stools with material choices that offer enhanced performance, sustainability, and comfort. Zody II is available in 9 mesh back colors and 5 digital knit back colors. Zody LX features a nature-inspired pebble-shaped back, and is fully upholstered in a variety of fabrics, leather, faux leather, and bleach cleanable materials. Updated trim options and colors on both chairs offer even more design flexibility. For more information, visit surfaces.haworth.com.

Dual posture not available on stools. Statement of line may vary by global region.

Haworth Design Studio & ITO Design

Our international team of designers works closely with research and development partners to create multi-generational products and global platforms—with regional needs and preferences in mind. Germany's ITO Design are experts in creating innovative solutions. Our collaboration brings a balance of global creativity and technical expertise to the Zody legacy, optimizing the user experience.

Aligning People and Space for Optimal Performance

Your people, organization, and facilities are at the center of everything we do. We help create spaces that solve for your business needs—resulting in effective people and efficient use of real estate.
